

## Advanced Recovery Concepts

Marie Barber, LISW-S

Marie Barber is an LISW-S who has extensive counseling experience in both inpatient and outpatient settings. She has counseled both adults and children for the past 25 years. Marie uses a Cognitive/Behavioral approach and feels strongly that if a client is flexible to making small, gradual changes they can overcome issues they may have been struggling with for years. Marie currently sees individuals, couples and families. Her experience includes, but is not limited to, working with clients who have physical disabilities, posttraumatic stress, bipolar or personality disorders, abuse issues or struggles with chronic anxiety or depression. Her goal is to empower you to create solutions that will lay the foundation for a more optimistic future.
